in Delhi and other metro cities meets the national ambient air quality standards in respect of Sulphur Dioxide ($S0_2$) and Oxide of Nitrogen (NOx). However, Suspended Particulate Matter (SPM) and Respirable Suspended Particulate Matter (RSPM) exceed the national ambient air quality standards at many places.

Monitoring of quality of water

1851, SHRI RAVULA CHANDRA SEKAR REDDY: Will the Minister of ENVIRONMENT AND FORESTS be pleased to state:

(a) whether Government are ensuring the monitoring of water quality in all areas;

(b) if so, the details thereof;

(c) the role being played by NGOs in this regard;

(d) what is the present status of National River Conservation Plan (NRCP), State-wise, river-wise and town-wise; and

(e) the present status of Ganga Action Plan?

THE MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENT AND FORESTS (SHRI NAMO NARAIN MEENA); (a) to (c) The Central Pollution Control Board alongwith State Pollution Control Boards is monitoring the water quality of different water bodies at 1019 locations covering 26 States and 6 UTs in the country The monitoring is conducted on monthly and quarterly basis in surface waters and on half yearly basis in respect of ground water. The present monitoring network includes 592 locations on rivers, 65 on lakes, 321 wells and remaining on tanks, canals, ponds, creeks and drains. The water quality is assessed based on physico-chemical and biological analysis. Regular water quality trends are brought out for evaluation and for taking corrective measures for prevention of water pollution.

The water quality monitoring is also carried out under National River Conservation Plan (NRCP) through reputed academic/research institutions to evaluate the impact of pollution abatement schemes taken up for Indian rivers Besides, Central Water Commission, Central and State Ground Water Boards, research institutions and laboratories under various NGOs are also carrying out monitoring of water bodies for various objectives.

(d) A Centrally Sponsored Scheme of NRCP is under implementation by Ministry of Environment and Forests in 160 towns located along polluted stretches of 34 rivers spread over 20 States at a cost of Rs. 4735.42 crore on 70:30 cost sharing between the Centre and respective State Government. The number of pollution abatement schemes sanctioned so far under the NRCP is 940, out of which 582 schemes have been reported to be completed. These schemes include installation of Sewage Treatment Plants, Interception and Diversion of Sewage, Low Cost Sanitation, Improved Wood Crematoria, River Front Development etc. A total sewage treatment capacity of 1872 million litres per day (mld) has been created under NRCP, besides 865 mld already created under the first phase of Ganga Action Plan. The pollution abatement works under NRCP are in various stages of progress in different States. The State-wise, river-wise and town-wise details of NRCP is given at Statement (See below).

(e) Under the Ganga Action Plan, 639 schemes of pollution abatement have been completed leading to the creation of an additional sewage treatment capacity of 1693 million litres per day (mld). In order to tackle the uncovered load in the river, Government has prepared a Master Plan and conducted the feasibility studies for sewerage (including sewage treatment) and non-sewerage components for four towns namely, Kanpur, Lucknow, Allahabad and Varanasi. Japan International Cooperation Agency has conducted a Development Study in this regard. A loan agreement has been signed between Government of India and Japan Bank for International Cooperation for further implementation of the pollution abatement works in river Ganga at Varanasi. Assistance has also been sought from the above agency for similar projects at Allahabad, Lucknow and Kanpur.

In spite of phenomenal increase in the urban population leading to substantial increase in pollution load of river Ganga over the past years, water quality of the river has shown improvement compared to that of pre
Ganga Action Plan.

Statement

State-wise and Town-wise details under National River Conservation Plan
